Profile Summary

Results-driven and detail-oriented **Information Science and Engineering** graduate with a strong foundation in **Software Development, Web Technologies, and Competitive Programming**. Seeking a Software Development role to apply problem-solving skills, contribute to real-world projects, and enhance industry knowledge.

Education

SJC Institute of Technology

BE in Information Science

CGPA: 8.62

Chikkaballapur, Karnataka

2022 – 2026

Projects

Autograd Engine + Neural Network

Mar 2026

Engineered a custom automatic differentiation engine implementing reverse-mode autodiff with a Tensor class supporting broadcasting, matrix multiplication, and gradient propagation; built a neural network framework with linear layers, activation functions, and gradient descent optimization.

Tech: Python, NumPy, Linear Algebra, Backpropagation, Neural Networks, Computational Graphs

Mini-GPT (Transformer from Scratch)

Jan 2026

Engineered a decoder-only Transformer model from scratch, implementing multi-head self-attention, positional encoding, and feedforward layers; built end-to-end training pipeline including tokenization, batching, loss computation, and text generation with autoregressive sampling.

Tech: Python, NumPy, Linear Algebra, Deep Learning, Transformers, Self-Attention, Backpropagation, NLP

Online Coding Platform

Jan 2025

Developed a web application for solving competitive programming and DSA questions, supporting multiple languages and real-time submissions. Worked as a Backend Developer.

Tech: Node.js, Express.js, MongoDB, Docker

Skills

- **Programming:** Java, Python, JavaScript
- **Web Development:** JavaScript, Node.js, Express.js, MongoDB, React.js API Development, PostgreSQL
- **Tools:** Docker, Git, VS Code, Postman NumPy.
- **Machine Learning:** Linear Algebra, Probability, Neural Networks, Backpropagation, Gradient Descent, Computational Graphs, Automatic Differentiation, Transformers (Self-Attention, Positional Encoding), NLP
- **DSA:** Arrays, Strings, Bit Manipulation, LinkedList, Stack, Queues and basics of Binary Trees.

Competitive Programming

Platforms: Active participant in **CodeChef**, **LeetCode**, **GeeksforGeeks**, regularly competing in coding contests.

Ratings:

○ **CodeChef:** 1400 (Current Rating)

○ **LeetCode:** 1623 (Global Ranking)

Profile:

Achievement

- Participated in national level hackathon conducted at Nitte Meenakshi Institute Of Technology.
- Completed a 160-day DSA coding challenge, solving data structures and algorithms problems daily and documenting progress on LinkedIn.
